## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Group I, comprising polyimide as the preferred species of thermoplastic component in the reply filed on May 17, 2005 is acknowledged.
2. Claims 2-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 17, 2005.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 5,731,373 (Hirose et al) as per reasons of record.

### *Claim Rejections - 35 USC § 103*

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6-8 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over U. S. 5,731,373 (Hirose et al), described hereinabove, as per reasons of record.

***Claim Rejections - 35 USC § 112***

7. Claims 7, 8, 11 and 12 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is indefinite because the length of “at least 150 micrometers” extends considerably *below* the much larger length of “about 1/3 (8.2mm)”, aka 8,200 micrometers, set forth in claim 7.

***Response to Arguments***

8. Applicant's arguments filed December 8, 2005 have been fully considered but are not found persuasive.

Applicants' main argument is that the “consisting essentially of” language excludes the presence of the lubricant oil and oil retaining material required by Hirose et al. It is applicants' contention that patentees require the use of these materials to achieve a low coefficient of friction. The terminology “consisting essentially of”, however, does not serve to distinguish the present claims over the cited prior art of record. This is because the additional ingredients required by Hirose et al, which aid in achieving a low coefficient of friction, would not appear to materially affect the basic and novel characteristics of the presently claimed invention. The presence of additional ingredients, which further aid in achieving a low coefficient of friction, is not precluded from the “consisting essentially of” language. This position is reinforced by applicants' examples and claims that further require the presence of a particulate polyimide. Consisting essentially of” does not mean “consisting of”. Accordingly, absent a showing that said additional materials would materially affect the basic and novel characteristics of the

claimed composition, no patentability can be seen in the present claims

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
